DETAILED ACTION

1. Claims 1-51 are presented for examination.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-51 are rejected under 35 U.S.C. 103(a) as being unpatentable over Huemoeller et al. (5,855,006 hereinafter Huemoeller) in view of publication by Borden titled “Contacts for the Web and Desktop” hereinafter Borden “.

With respect to claims 1-4, 9-15, 18-24, 26-29, 33-40, 43-49 and 51, Huemoeller teaches an event planning process by a server system in a computer network including a plurality of user terminals communicatively coupled with the server system via the network (Figures 19-21). Providing an even planning user interface at a user terminal, the interface enabling a user to plan an event (Figures 3-6); receiving event information input by the user, said event information indicating a scheduled event (Figures 3-6).

Humoeller does not specifically teach at least one invitee to be invited to the scheduled event by providing an invitation to said invitee. Borden teaches a database of contacts (invitee) and sending e-mail invitations to the invitee that they can either accept or decline(RSVP)(page 2). It would have been obvious to a person of ordinary skill in the art at the time of Applicant’s invention to have included providing an invitation to the invitee because such a modification would allow the user to save time and money by integrating the event planning process with the invitation process system.

With respect to requiring a payment as defined by the RSVP fees and receiving the payment information. Since the combination of Huemoeller and Borden teach that the message is sent with a RSVP request then it would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included requiring a payment because such a modification would allow the user to obtain finance in advance for the event.

With respect to claims 5, 6, 30 and 31, the claims further recite sending a post card and via a fax with a universal resource location for accessing the invitation web page via the network. Official notice is taken that it is old and well known in the communication arts to have included a fax, a post card with the invitation including a universal resource locator for accessing the invitation web page via the network. For example, for certain wedding invitations, the invitee receives a post card or the like in which an URL is printed on the post card and the invitee can access the invitation by accessing the URL. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included sending a post card and via a fax with a universal resource location for accessing the invitation web page via the network because such a modification would provide a lower cost process of invitation by allowing the invitee to access an URL rather than printing and mailing an invitation by regular mail.

With respect to claims 7 and 32, the claims further recite receiving information by plain telephone system via an interactive voice response system. Official notice is taken that a plain telephone system is an interactive voice response system used for various purposes including to provide an invitation. It would have been obvious to a person of

ordinary skill in the art at the time of Applicant's invention to have included receiving information by plain telephone system via an interactive voice response system because such a modification would provide a more personal contact.

With respect to claim 8, further recites providing a plurality of invitation template each associated with the different event. Official notice is taken that providing a plurality of invitation template each associated with the different event would allow customization of the different events. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included providing a plurality of invitation template each associated with the different event in order to achieve the above mentioned advantage.

With respect to claims 16, 17, 41 and 42, further recites specifying who can view the posted messages. Official notice is taken that specifying who can view or download a message is old and well known to provide a more secure system. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included specifying who can view the posted messages in order to provide the above mentioned advantage.

Claims 25 and 50 further recite selecting an invitee from a member of an affiliated organization. Official notice is taken that selecting invitee from an affiliated group or organization is old and well known to provide the selection process to be from a desired group of people. It would have been obvious to a person of ordinary skill in the art at the time of Applicant's invention to have included selecting an invitee from a member of an affiliated organization in order to obtain the above mentioned advantage.
